Assignment 4

The due date for submitting this assignment has passed.
As per our records you have not submitted this assignment.

Due on 2019-08-28, 23:59 IST.

1) How many man-hours is a man-month? *1 point*

○ a. 142
○ b. 152
○ c. 162
○ d. 172

No, the answer is incorrect.
Score: 0
Accepted Answers:
b. 152

2) Which one of the following is the correct order in which a software project manager estimates various project parameters while using COCOMO? *1 point*

○ a. cost, effort, duration, size
○ b. cost, duration, effort, size
○ c. size, effort, duration, cost
○ d. size, cost, effort, duration

No, the answer is incorrect.
Score: 0
Accepted Answers:
c. size, effort, duration, cost

3) Which one of the followings is NOT a factor for "Lines of code" being considered a poor software size metric? *1 point*

○ a. It is programming language dependent.
○ b. It penalizes efficient and compact coding.
○ c. It is programmer dependent.
○ d. It is dependent on the complexity of the requirements.

No, the answer is incorrect.
Score: 0
Accepted Answers:
d. It is dependent on the complexity of the requirements.

4) Which one of the following estimating methods is most appropriate when detailed information about the project is lacking? *1 point*

○ a. Parametric Models
○ b. Basic Expert Judgement Technique
○ c. Analogy-Based Method
○ d. Price to win

No, the answer is incorrect.
Score: 0
Accepted Answers:
d. Price to win

5) Which one of the followings is NOT a limitation of bottom-up estimation? *1 point*

○ a. It may overlook many of the system-level costs.
○ b. It may be inaccurate because the necessary information may not be available in the early phase.
○ c. It tends to underestimate and overlook complexities of low-level components.
○ d. It tends to be more time-consuming.

No, the answer is incorrect.
Score: 0
Accepted Answers:
c. It tends to underestimate and overlook complexities of low-level components.

6) Which one of the followings is NOT a desirable characteristic of a good algorithmic estimation model? *1 point*

○ a. A clear procedure for estimation is provided
○ b. Subjective factors are avoided
○ c. Results are valid for a wide range of parameter values
○ d. Requires data that are accurately known only in future

No, the answer is incorrect.
Score: 0
Accepted Answers:
d. Requires data that are accurately known only in future

7) Which one of the followings is NOT a key component in function point analysis? *1 point*

○ a. External Inputs
○ b. External Outputs
○ c. External Operations
○ d. External Inquiries

No, the answer is incorrect.
Score: 0
Accepted Answers:
c. External Operations

8) In function point analysis, how many general systems characteristics are evaluated and used to compute the Value Adjustment Factor (VAF)? *1 point*

○ a. 12
○ b. 13
○ c. 14
○ d. 15

No, the answer is incorrect.
Score: 0
Accepted Answers:
c. 14

9) Which one of the followings is NOT a disadvantage of function point analysis? *1 point*

○ a. It is labor intensive.
○ b. Extensive training is required.
○ c. Does not consider algorithmic complexity of a function.
○ d. It is hard to fudge

No, the answer is incorrect.
Score: 0
Accepted Answers:
d. It is hard to fudge

10) Which one of the following function points is most suitable for use in embedded system development projects? *1 point*

○ a. IFPUG function points
○ b. Mark II function points
○ c. COSMIC function points
○ d. None of the above

No, the answer is incorrect.
Score: 0
Accepted Answers:
c. COSMIC function points
