Assignment 11

The due date for submitting this assignment has passed.
As per our records you have not submitted this assignment.

Due on 2019-10-16, 23:59 IST.

1) Which one of the following is the basic focus of the modern quality assurance paradigms? *1 point*

○ a) Process assurance
○ b) Product assurance
○ c) Thorough testing
○ d) Thorough testing and rejection of bad products

No, the answer is incorrect.
Score: 0

Accepted Answers:
a) Process assurance

2) Which one of the following ISO quality assurance standard applies to software development organizations? *1 point*

○ a) ISO 9000
○ b) ISO 9001
○ c) ISO 9002
○ d) ISO 9003

No, the answer is incorrect.
Score: 0

Accepted Answers:
b) ISO 9001

3) A software organization has been assessed at SEI CMM Level 4. Which one of the following does the organization need to achieve, for satisfying one of the KPAs of CMM Level 5? *1 point*

○ a) Defect detection
○ b) Defect prevention
○ c) Defect isolation
○ d) Defect localization

No, the answer is incorrect.
Score: 0

Accepted Answers:
b) Defect prevention

4) Which one of the following can be considered to be the focus of "quality control"? *1 point*

○ a) All development work products are delivered on time and under budget
○ b) The development process is completely documented and adhered to during development
○ c) The performance of the development work products are measured
○ d) All development work products are thoroughly tested before delivery to the customer

No, the answer is incorrect.
Score: 0

Accepted Answers:
d) All development work products are thoroughly tested before delivery to the customer

5) Which one of the following is expected to observed in a software development organization assessed at the SEI CMM repeatable level? *1 point*

○ a) Success in development of a software can be repeated
○ b) Success in development of a software can be repeated on similar software development projects.
○ c) Success in development of a software can be repeated in all software development projects that the organization might undertake.
○ d) When the same development team is chosen to develop another software, they can repeat their success.

No, the answer is incorrect.
Score: 0

Accepted Answers:
b) Success in development of a software can be repeated on similar software development projects.

6) Which one of the following is a requirement for ISO 9001 certification? *1 point*

○ a) Demonstrate that the developed software has fulfilled its quality requirements
○ b) Submit the reliability assessment of all the developed software
○ c) Document the process being followed
○ d) Demonstrate that through stringent design and use of coding standards, testing is largely made redundant

No, the answer is incorrect.
Score: 0

Accepted Answers:
c) Document the process being followed

7) In CMMI, which one of the following is the name of the maturity level 5? *1 point*

○ a) Six Sigma
○ b) Optimized
○ c) Statistical
○ d) Optimizing

No, the answer is incorrect.
Score: 0

Accepted Answers:
d) Optimizing

8) Which one of the following summarizes an important difference between quality assurance and quality control? *1 point*

○ a) Thorough product testing
○ b) Ensuring that a good process is in place and has been documented
○ c) Ensuring that a good team is in place
○ d) Ensuring adequate usage of modern automated development tools

No, the answer is incorrect.
Score: 0

Accepted Answers:
b) Ensuring that a good process is in place and has been documented

9) Which one of the following SEI CMM maturity levels should be recommended to a small startup company that focuses on outsourced software development and software maintenance work. *1 point*

○ a) Level 1
○ b) Level 2
○ c) Level 4
○ d) Level 5

No, the answer is incorrect.
Score: 0

Accepted Answers:
b) Level 2

10) Which one of the following is a software defect? *1 point*

○ a) A mistake made by a team member during requirements specification
○ b) A change that the team needs to make based on a finding during code review
○ c) A configuration management plan that is too elaborate
○ d) A change request that has been launched by the customer

No, the answer is incorrect.
Score: 0

Accepted Answers:
b) A change that the team needs to make based on a finding during code review
